DETAILED ACTION

The labeled drawing sheet(s) of the present invention are attached to show examiner's understanding of the disclosed and claimed inventions.

New grounds of rejection

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

1. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Paul Kohl et al. "Wafer-Level Packaging Addresses ... Interconnections", Apr '01.

With respect to claim 1, Kohl et al. teach a structure for providing resilient interconnections in a wafer level package, comprising a conductive pad overlays an air space, wherein at least a portion of the air space extends laterally beyond the conductive pad. See fig 1. and its associated text of Kohl et al.

Response to Arguments

2. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

3. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
